

Rebroadcast of December 20 original broadcast
CDC Responds:
Influenza — Prevention, Detection,
and Control

Note: December 20 and 21 original broadcasts will be rebroadcast back to back.
See page 2 for information on Anthrax broadcast.

Rebroadcast
Thursday, January 31, 2002
12:30 PM - 2:00 PM ET

This live satellite and web broadcast will present an update on the clinical presentation, diagnosis, treatment, and prevention of influenza. Included will be an overview of the impact of influenza in the community and in healthcare settings, the use of influenza vaccination, and the use of influenza antiviral medications. An update on the availability of influenza vaccine for the 2001 season will also be provided.

Goal

To provide an update on prevention, detection, and control strategies of influenza.

Objectives

After the program, participants will be able to:

- Describe the clinical signs and symptoms associated with influenza.
- Define the impact of influenza in the community and in healthcare facilities.
- Understand the use of influenza diagnostic tests and antiviral medications.
- Identify at risk populations targeted for influenza vaccination and obtain information on the vaccine supply for 2001-2002.

Target Audience

Clinicians, infection control professionals, public health officials, other healthcare personnel

Faculty

Edward L. Baker, MD, MPH, Director, Public Health Practice Program Office, Centers for Disease Control and Prevention (CDC), Assistant Surgeon General, US Public Health Service

James M. Hughes, MD, Director, NCID, CDC

Carolyn Bridges, MD, Influenza Branch, National Center for Infectious Diseases (NCID), CDC

Tim Uyeki, MD, Influenza Branch, NCID, CDC

Matthew Kuehnert, MD, Division of Healthcare Quality Promotion, NCID, CDC

Dennis O'Mara, Immunization Services Division, National Immunization Program, CDC

Carol Glaser, DVM, MD, Division of Communicable Disease Control, California Department of Health

Continuing Education Credit

- No registration is required to view or attend
- No continuing education credit will be provided

Rebroadcast of December 21 original broadcast

CDC Responds:

Update on Options for Preventive Treatment for Persons at Risk for Inhalational Anthrax

**Note: December 20 and 21 original broadcasts will be rebroadcast back to back.
See page 1 for information on Influenza broadcast.**

Rebroadcast

Thursday, January 31, 2002

2:00 PM - 3:30 PM ET

This live satellite and web broadcast will present to clinicians and public health officials an update on prophylactic treatment options for prevention of inhalational anthrax for persons who were exposed to anthrax spores and who are currently completing 60-day courses of prophylactic antibiotics. A panel of experts from the Centers for Disease Control and Prevention (CDC) will review the options for individuals exposed to *B. anthracis* and at risk for inhalational anthrax. A question and answer session will enable participants nationwide to pose questions to panelists during the program.

Goal

To provide an update to clinicians and public health officials on the treatment options for prevention of inhalational anthrax for persons exposed to anthrax spores.

Objectives

After the program, participants will be able to:

- Understand the rationale for three treatment options
- Describe the recommended protocol, IND and consent issues, and efficacy of the anthrax vaccine
- Discuss prophylactic antibiotic efficacy and safety issues

Target Audience

Public health officials, clinicians in internal medicine, infectious disease, general practice, family practice, and occupational medicine, and other healthcare personnel

Faculty

James M Hughes, MD, Director, National Center for Infectious Diseases (NCID), CDC

Julie L. Gerberding, MD, MPH, Acting Deputy Director, NCID, CDC

Bradley A. Perkins, MD, Chief, Meningitis and Special Pathogens Branch, Division of Bacterial and Mycotic Diseases (DBMD), NCID, CDC

Nina Marano, DBMD, NCID, CDC

Nancy Rosenstein, MD, DBMD, NCID, CDC
